$ kubectl apply -f service-v2.yaml
service/lab8-service-v2 created
```

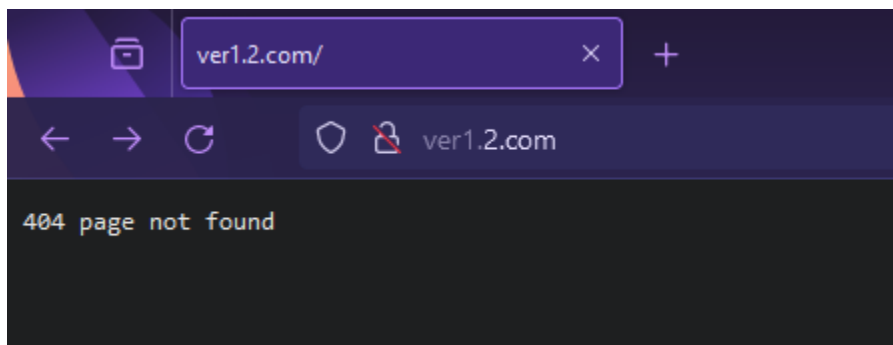

1.

```
onira@DESKTOP-886Q14P MINGW64 /z/Users/onira/Documents/_FINKI/_FINKI labs/Finki/Kontinuirana integracija i isporaka/Lab 9 (main)
$ kubectl apply -f ingress.yaml
ingress.networking.k8s.io/lab8-9-ingress created
```

2.

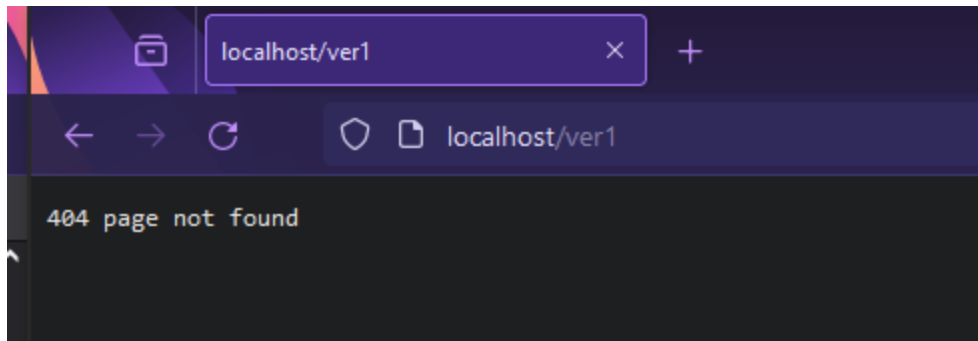

3.

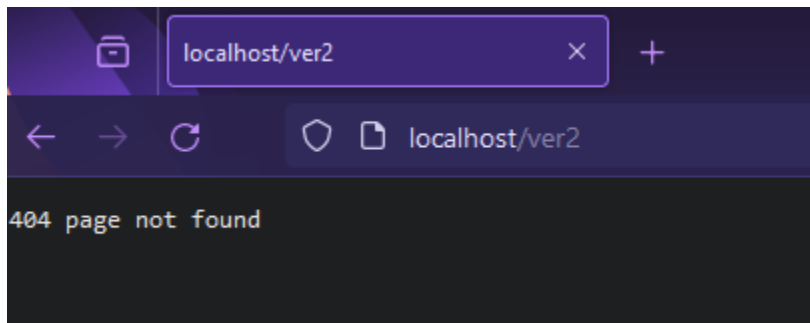

4.

овие две се исти
во првиот дел бидејќи заборавив да го сменам во ингресот.

5.

6.

7. Не знам зошто дава 404 ерор.
